

10 ways tenants can beat damp and mould

Make sure vents remain uncovered and extractor fans are working

Keep windows open when you can to allow good ventilation

Put lids on pans to stop steam escaping

Don't leave your kettle boiling continuously

Dry clothes outside when possible

Keep the household heating on a low level for longer periods

Wipe windows and windowsills with a dry cloth to remove sitting moisture

Leave internal doors open so air can circulate around the property

Use a dehumidifier

If a soft furnishing is mouldy - make sure it is professionally cleaned
