

A FULL SUITE OF GLOBAL ENTITY MANAGEMENT SOLUTIONS. HOW SWEET IS THAT?

A successful, well-run company operates with an embedded culture and proven framework of compliance and corporate governance. Your company runs no differently.

However, increased entity compliance and regulatory complexities are par for the course as your company expands in size and scope. A surge in market pressures and business continuity challenges enhances the importance of great subsidiary governance. Conquering global entity management is no easy task. Add in multiple third-party partners, inconsistent global processes, and no single source of truth¹ (just to name a few) and you've got the perfect disaster resulting in complete and total compliance chaos.

You simply cannot have that. You need a modern, comprehensive approach across your entire organization. A 'Full-Suite' if you will, offering you seamless domestic and international benefits you never thought possible.

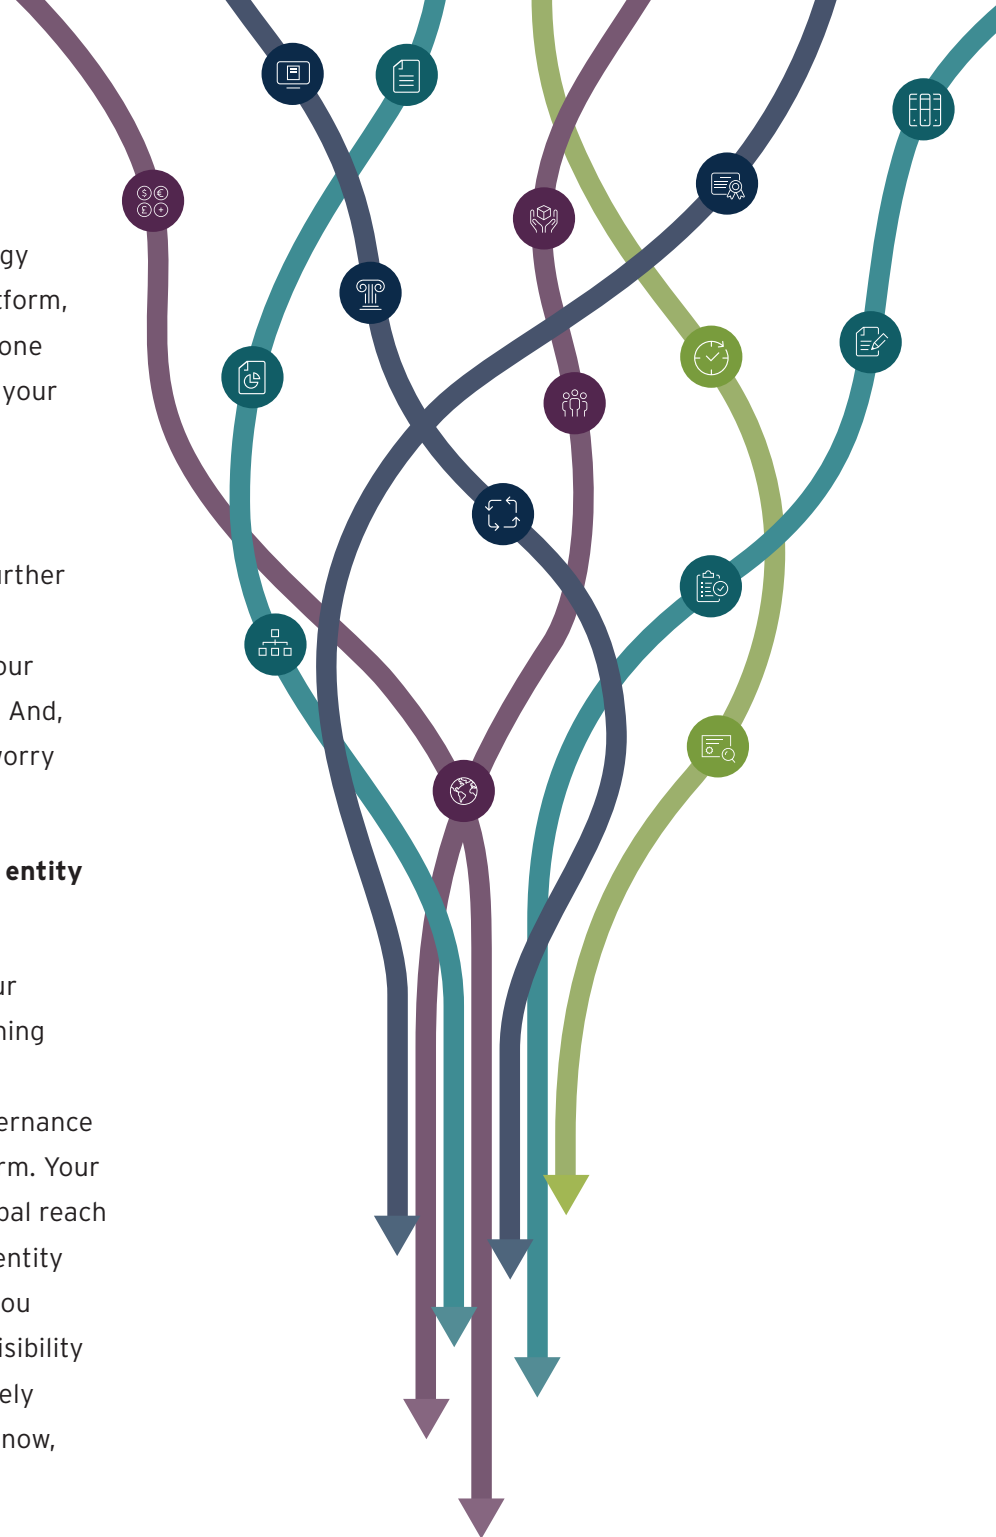

A solution of this scale requires integrated services and innovative technology giving you confidence in your entity data. With a centralized technology platform, you bring together your entity management and registered agent data into one system, streamlining the chaos of compliance control and aligning well with your overall vendor consolidation strategy.

But that's not all.

With the right entity management technology, you open endless avenues, further maximizing your global efficiencies. By leveraging a team of trusted experts you'll have the right people in place to assist in managing every aspect of your global entities, ensuring consistent governance processes around the globe. And, governance advisory services, well that's standard, so you'll never have to worry about mismanagement of your global corporate structure.

One partner, one platform and one global solution to manage everything entity management. Sounds pretty sweet, right?

Computershare's global entity management suite of services, powered by our forward-thinking technology platform, GEMS™, gives you the best of everything entity management. With the GEMS platform at the core of your compliance framework you reduce risks, alleviate compliance burdens and enhance governance practices with one solution integrating entity everything into a single platform. Your data becomes more accessible and accurate, and you get a partner with global reach and local expertise across 150 jurisdictions worldwide helping you conquer entity compliance management complexities, no matter where you operate. And, you gain a single source of truth across your entire organization providing full visibility into all your registered agent and entity governance needs. You'll be massively productive focusing on high priority business goals and objectives because, now, you'll have a half-tech/half-human entity compliance management tool.

ONE PLATFORM. ONE LOGIN. ONE VENDOR.

A complete global governance solution delivered by the right partner with the right technology keeps you free from unnecessary financial, compliance and operational risks while facing today's world head on.

Global Entity Management.

The GEMS platform offers a centralized approach for companies to achieve global compliance, minimize risk and increase transparency. With the GEMS solution, you'll be able to log on – anytime, anywhere – and immediately verify your entity structure and compliance status.

Registered Agent Services.

Have confidence your entities maintain good standing. With your U.S. registered agent data expertly filed and updated in the GEMS platform on your behalf, you can move on from the time-consuming oversight of transactional services, service of process and annual report obligations.

Global Entity Management as a Service.

Take control with a centralized solution bringing together global entity management services, U.S. registered agent, governance advisory and software to provide a single source of global truth supported by an expert global support team. Your company can realize greater cost control, compliance certainty, cost reductions across the board and more consistent processes.
